

A number of you have asked about parking. The garden bungalows will have their own garages, of course, but we're thinking of offering both surface parking and separate garages for the condos and seniors apartment building. Please help us decide by answering a few questions:

1. How many cars will you have?

Please choose

(obviously if you pick "None", you don't need to complete the survey. We were just wondering if there will be any no-car residents.)

2. Included in the price of the apartment is one surface parking spot. Would you be interested in buying a second surface space?

Yes No

What would you expect to pay?

Please choose

3. We plan to construct rows of surface single car garages.

(There will be one available for every two apartments)

Would you be interested in buying one?

Yes No

What would you expect to pay?

Please choose

Comments?

Thank You,

Pierre Boiron
